Catcher D531 & D511条码扫描器

Datalogic Catcher D531 & D511 Scanner

Two models of the Datalogic Catcher? are available: the Datalogic Catcher? D531 multi-interface (USB, RS232 and Wedge) and the Datalogic Catcher? D511 that combines the standard serial interface with complete connectivity to IBM46xx cash registers. Both models are provided with the "Single Line" option: by simply pressing the button on the reader, the omni-directional pattern becomes a single line, which is very useful for manual reading of codes close to each other.

The readers can also be configured in "stand-by" mode to minimize consumption when the scanner is not in use: the scanner will automatically "wake-up" when it detects a code. Confirmation of the code read is provided by a beeper that can be heard in loud environments and a bright led that can be seen even in well-lit environments.

The Datalogic Catcher? is the ideal solution for "check-out" counter applications in Retail markets and "front-desk" applications in Office automation markets such as manual reading of documents, envelopes and small packages in post offices and couriers.

Features

High reading performance: 20 scan lines and 1500 scans/sec.

Reduces dimensions

Interfaces: USB, RS232 and Wedge in a single model

Firmware update

"Single Line" option

EAS connectivity

Applications

Distribution and Retail

POS/Check-out, Convenience stores, Cash & Carry, Gas stations, Book stores, Pharmacies

Office Automation

Document handling/Front desk, Post offices, Couriers, Public offices
